Company-

Getac products are available through multiple contract vehicles. The pricing LCSO has received is from the National Cooperative Purchasing Alliance (NCPA) contract. Other options, such as GSA and Texas-DIR exist, too.

Getac has been in business since 1989.

Getac has been making public safety video systems since 2005 and ruggedized public safety computers/tablets for longer than that.

Partner agencies nearby have relied on Getac products and service for a while, such as WSP and TCSO.

Multiple agencies in the Region are also going to deploy Getac in-car video, body-worn cameras, and Cloud software. Regional cohesiveness will be improved with similar equipment being used.

Getac can offer local service and expertise to guarantee the success of this project.

Credible references were provided by more than one agency with experience with multiple agencies, all of which agreed that Getac's service and product is superior.

The Getac solution offers some unique features and characteristics, such as:

- Sealed/All-in-One BWC construction designed to prevent unintentional disassembly (built-in battery, memory, etc)

- Designed with Officer Safety in Mind- covert mode can be activated with gross motor skills (some manufacturers require small button to be held for 5 or more seconds)

- Easy to Use Hands-Free Mute capability that is compliant with policy/RCWs

- Cutting Edge In-Car Video technology- All-in-One DVR with TWO FULL-HD Cameras (front facing and rear cabin cameras support 1080p)

- Designed for less failure points- built-in power supply, PoE controller, Network Connections (wifi, ethernet, GPS)

- Getac's solution includes Automatic Vehicle Location features to increase situational awareness and response capability.

- Getac's cloud solution allows for the upload and storage of non-Getac video and photos, which will make secure sharing easier and faster.

- Getac's solution does not charge for user licenses, allowing LCSO to expand user access to the Cloud solution without incurring additional costs.

- Getac's solution includes advanced redaction tools at no additional cost that will allow LCSO to use redaction technology that provides the least costly commercially available method of redacting body worn camera recordings, to the extent possible and reasonable.
