

October 31, 2022

To whom it may concern;

I am writing to you in regards to the proposed amendment: "Mining Opt in rezoning (Brim Road, Onalaska, WA)".

I am a 4th generation resident on this road and now together with my family we are raising the 5th generation of kids in this area on agricultural land which will be greatly affected if proposal of the land mining is approved.

Although, I understand the positives that this business may bring to a community as I have raised my children partially on money earned from a mine, I am wanting to make my voice heard on the negative impact it will have for my family and others around me.

Let me paint you a picture of what life is like for me growing up here and the life my children and cousins, nieces and nephews have been lucky to experience in this day and age. This is a quiet, safe area where children play and ride their bikes and horses down the road, lead their show animals down the road and may walk to the local store. I fear that this will change for them if this is approved. Safety will diminish, it will no longer be a quiet place with the noise of equipment and trucks by the hundreds using "our" road.

If approved this will also affect our ground water, wetlands, and air quality. I am not against using the land for its resources I just want to do it with the least amount of impact on our community.

I know that there is big money to be made by this idea but please do not overlook our small community and keep our values in mind when considering the approval of this proposal.

Sincerely,

Candice Kinsman-Auman

I am not if I may include another statement/solution to my points, but if I may inquire about routing traffic through another way other than on Brim Road; maybe Pinkerton road where there are less families/farms?
