Combined User Committee

To: Board of County Commissioners, Lewis County

From: Combined User Committee, Lewis County 911 Communications

Re: Support of 911 Sales and Use Tax Ballot Measure

We the undersigned, as users of the dispatch services of Lewis County 911 Communications, write to you today in support of a ballot measure for a 911 Sales and Use tax as defined by Washington RCW 82.14.420. As defined in the RCW, "Moneys received from any tax imposed under this section must be used solely for the purpose of providing funds for costs associated with financing, design, acquisition, construction, equipping, operating, maintaining, remodeling, repairing, reequipping, and improvement of emergency communication systems and facilities."

As the users of dispatch services, we rely on the 911 center to provide high-quality dispatch services, using technologies that are current and supported. While the basic dispatch needs, such as computer aided dispatch, phone systems and dispatch radios, are currently maintained at minimal levels, the ability to fund replacement in the future is not attainable with the current funding model. Additionally, the option to assess and implement new technologies that would aid the dispatchers and the field responders is severely limited by the current funding model.

The current funding model relies solely on fees gathered from user agencies; these agencies themselves are faced with financial burdens that hamper their own operations. Furthermore, it is not in the best interest in the long-term for 911 to be reliant on user agency funding. As a necessary and vital public service, 911 should be independently funded to ensure ongoing stable operations.

A 911 sales and use tax would have the following immediate impacts on Lewis County 911 Communications:

- Provide the dispatch center with an independent funding source and reduce reliance on user agencies
- Stabilize funding for existing operations, including maintenance and support of current systems and equitable compensation for 911 dispatchers
- Allow for implementation of new technologies that would help 911 provide more efficient and faster responses to the public
- Provide funding for a dispatch center in a safe and secure location, with adequate facilities to support both small and large emergencies
- Ensure that the people of Lewis County will receive the best 911 services possible
- Assist the emergency services agencies in Lewis County provide quality, timely services.

It is ultimately the will of the people of Lewis County to support this initiative; we ask only that the Board of County Commissioners for Lewis County support presenting the option to the public.

Outlook-1yfsp5ht; Support Letter to BOCC.docx;

Hello,

As we discussed at the last CUC meeting, the BOCC is looking for support from your agencies and elected officials to support a 911 tax. I had previously sent out the draft support letter that your agency can use to support the Sales and Use Tax for 911. I received a few general edits from the group so I am sending out a new copy. If you have already signed the previous version, that is fine as well. The edits were minor.

You are also welcome to draft your own letter to the BOCC; this is merely an one option. If you have any questions, please let me know. We are hoping to have all letters by the next CUC meeting on June 15th.

Thanks,

Jennifer Libby-Jones, ENP

Director of 911 Communications

Lewis County, Washington

351 NW North St, Chehalis, WA 98532
