YOUR PROJECT

What is your "Public Facilities" project?

Please provide a brief description of your project in the space below.

Description:

This project proposes an engineering fill of a lot that formerly held a hostel. The hostel was severely damaged by a fire and rebuilding is not feasible. The city would like to re engineer the space as a parking lot to accomodate patrons of downtown businesses as parking spaces are currently limited in their business district.

How Will This Project Create Or Retain Business Or Jobs?

"Jobs" are defined by the .09 advisory committee as employment that produces products and services and exports products and services outside of Lewis County, resulting in new money coming into the community. This traditionally includes manufacturing, logistics, and other production facilities. This typically excludes retail and service sectors and other tertiary jobs producers.

Description:

This project aims to create jobs by revitalizing their downtown business district. The current project site consists of the remains of a hostel fire and that has hindered growth in the immediate area. By removing the fire damage and creating a welcoming, inviting space for patrons to park and visit downtown, businesses are incentivized to expand and settle in the area. This project would be part of a larger downtown revitalization effort, which includes ADA and frontage improvements throughout the downtown corridor.
