------	-------------	-------------	-------	-----	------------

Scope of work:

- Supply and add the following cards to the amplifying unit
 - (1) 2-channel Input Card
 - (1) 2-channel Output Card, replacing the existing 1-channel output card
- Modify and revise existing amplifying unit's programming and configuration
 - Add Codec audio i/o into the sound system and control panel functionality
- Install flat-panel displays at side-wall location noted on Ednetics' floor-plan redline, utilizing articulated wall-mount hardware
- Install Cisco codec and related support equipment in existing equipment rack
- Install (2) Cisco PTZ cameras
 - 1 camera wall-mounted on front-wall; nominally to be used to capture Defense and Prosecution positions
 - 1 camera wall-mounted on side-wall close to the location of the flat-panel displays

Assumed use-case is that when Judge is interacting with a remote party, they will be looking in the direction of the display on the sidewall; thereby approximating "eye-contact" between parties

Cisco Precision 60 camera does not have adequate zoom range (20x max) to offer good framing of the Judge from the courtroom's rear-wall (approx.. 41-ft); therefore, mounting the judge's camera on the sidewall is deemed to be a better solution since this location is significantly closer to the bench.
 - Cable between the codec at the AV rack to the two (2) camera positions. Given the distance from the AV rack to the Front-wall camera position, cabling to this location will utilize an SCT camera extension kit.
- Cable and install HDMI extension kits at the Defense and Prosecution desks to provide two (2) BYOD content input at the Cisco codec.
 - BYOD content from these two locations will therefore be available as content sources to the Cisco VTC/UC/presentation environment.
- It is assumed that the Touch10 is to be located at the Court Clerk's desk. We will cable to this location.

Customer Assumptions/Already Provided:

- Electrical power to the two (2) flat-panel displays and (2) PTZ cameras to be installed by others.
- All OFE equipment in good working order and will be very substantially retained as is, including:
 - M2 Mixer/Amp
 - system Remote Control
 - Courtroom Recording system
 - Microphones
 - Audio amplifier & loudspeakers
- All supplied equipment is in good working order.
- Network connectivity, networking hardware and configuration.

1 Courtroom Installation Fees Subtotal	\$220,457.60
