THE Parties agree as follows:

SECTION 1 GRANT OF EASEMENT

1.1 Easement Defined.

- (a) State grants and conveys to Grantee a nonexclusive easement, subject to the terms and conditions of this agreement, over, upon, and under the real property at Skate Creek Bridge: described in Exhibit A. In this agreement, the term "Easement" means this agreement and the rights granted; the term "Easement Property" means the real property subject to the easement.

- (c) This Easement does not include any right to harvest, collect or damage any natural resource, including aquatic life or living plants, any water rights, or any mineral rights, including any right to excavate or withdraw sand, gravel, or other valuable materials, except to the extent expressly permitted in Exhibit B.
- (d) This Easement does not include the right to grant easements and franchises to third parties.

1.2 Survey and Easement Property Descriptions.

- (a) Grantee prepared Exhibit A, which describes the Easement Property. Grantee represents that Exhibit A is a true and accurate description of the Easement boundaries and the improvements to be constructed or already existing in the Easement area. Grantee's obligation to provide a true and accurate description of the Easement Property boundaries is a material term of this Easement.
- (b) State's acceptance of Exhibit A does not constitute agreement that Grantee's property description accurately reflects the actual amount of land used by Grantee. State reserves the right to retroactively adjust fees if at any time during the Term State discovers a discrepancy between Grantee's property description and the area actually used by Grantee.
- (c) State accepts a preliminary Exhibit A upon the Commencement Date of this Easement. Grantee shall submit a final Exhibit A for State's approval within three hundred sixty five (365) days of the Commencement Date. Upon State's written approval, the final Exhibit A supersedes the preliminary Exhibit A. Until superseded, the preliminary Exhibit A has full legal effect.

1.3 Condition of Easement Property. State makes no representation regarding the condition of the Easement Property, improvements located on the Easement Property, the suitability of the Easement Property for Grantee's Permitted Use, compliance with governmental laws and regulations, availability of utility rights, access to the Easement Property, or the existence of hazardous substances on the Easement Property.

The Permitted Use is described or shown in detail in Exhibit B.

2.2 Restrictions on Use.

- (a) The limitations in this Paragraph 2.2 apply to the Property and adjacent state-owned aquatic land. Grantee's compliance with this Paragraph 2.2 does not limit Grantee's liability under any other provision of this Easement.
- (b) Grantee shall not cause or permit:
 - (1) Damage to natural resources except to the extent expressly permitted in Exhibit B
 - (2) Waste, or
 - (3) Deposit of material, unless approved by State in writing and except to the extent expressly permitted in Exhibit B. This prohibition includes deposit of fill, rock, earth, ballast, wood waste, refuse, garbage, waste matter, pollutants of any type, or other matter.

2.4 Liens and Encumbrances. Grantee shall keep the Easement Property free and clear of any liens and encumbrances arising out of or relating to its use of the Easement Property, unless expressly authorized by State in writing.

 - (1) State shall provide Grantee a reasonable time to take all steps necessary to remedy the condition of the Easement Property. State may require Grantee to enter into a right-of-entry or other use authorization prior to the Grantee entering the Easement Property to remedy any breach of this Paragraph 3.3.
 - (2) If Grantee fails to remedy the condition of the Easement Property in a timely manner, State may take any steps reasonably necessary to remedy Grantee's failure. Upon demand by State, Grantee shall pay all costs of such remedial action, including but not limited to the costs of removing and disposing of any material deposited improperly on the Easement Property, lost revenue resulting from the condition of the Easement Property prior to and during remedial action, and any administrative costs associated with the remedial action.

6.2 Late Charge. If State does not receive any payment within ten (10) days of the date due, Grantee shall pay to State a late charge equal to four percent (4%) of the unpaid or Fifty Dollars (\$50), whichever is greater, to defray the overhead expenses of State incident to the delay.

6.3 Interest Penalty for Past Due Fees and Other Sums Owed.

On demand by State, Grantee shall pay all costs and/or damages.

1. DESCRIPTION OF PERMITTED USE

- A. Existing Facilities.** The following Improvements are located on the Easement Property: one (1) bridge authorized under Commissioner’s Order 50-CR1464. The bridge is a two lane single span road bridge with two piers. The structure is 392 feet long, 32 feet wide. The bridge crosses the Cowlitz River at river mile 126.5. The southern abutment (pier 1) and the northern abutment (pier 2) structures both consist of pier walls on top of a spread footing, while support feature 1 consists of seven timber piles, support features 2, 3, and 4 have eight timber piles each, and support feature 5 is made up of five timber piles. Pier 1 is the only structural component of the bridge that is situated below the ordinary high water line.

Currently 80 feet of the upstream southeast riverbank has been improved with the placement of previously buried riprap and riprap was placed along the floor of the waterway under the left approach. The northwest bank has an existing revetment from the centerline of the bridge to 35 feet upstream and 750 feet downstream. Two hundred feet upstream from the bridge is a log buttress. The Improvements are Grantee-Owned Improvements.

- B. Proposed Facilities.** Bank Stabilization improvements will be authorized under this easement.

The proposed facilities include the addition of three (3) barbs upstream of the bridge along the southeast bank, placement of two (2) barbs upstream of the bridge along the northwest bank and the placement of riprap around the eastern bridge pier (Pier 1). Fifteen (15) pieces of large woody debris will be anchored to the southeast bank downstream. Excavation may be required to a depth of three feet to key in materials. One temporary access road will be constructed below the bridge approach.

1. The large woody debris will be placed below ordinary high water to offset the loss of woody debris recruitment resulting from placement of the five barbs along the stream banks.
2. Provide signage 500’ upstream of the upstream-most barbs on the northwest and southeast banks and upstream of the upstream-most large woody debris structure.
3. Provide DNR aquatics a yearly report that includes: findings/corrective actions taken (as needed) from monitoring biannually, as well as, monitoring following large storm events. (Please refer to attachment 1 for exhibit B.)
